

Mission Statement : 2019

1. To work with the client to create a domestic residential architecture (Design & Planning Only) that is:

- Contemporary
- Relevant
- Sustainable
- Innovative
- Unique
- Comfortable

The architecture therefore is one in which requires the skills of an architect. Where it is a case of simply 'drawing up' the clients design I will recommend a more suitable person..

2. To work with the site and planning to create a domestic residential architecture that is:

- Contextual
- Fits Planning development plans & guidelines
- Understands and takes the site into account; including:
 - Sun paths
 - Wind direction
 - Shading features
 - Topography
 - Existing traditional forms

2. To work to RIAI Good Practice, guidelines and conduct. For domestic projects I will use an adapted version of the "RIAI Domestic Agreement between Architect and Client."

2. As a Grade III Conservation Accredited Architect I will work and advise on 'best practice' restoration and conservation techniques.

4. To recommend and work with other professionals where their expertise is greater than mine, including:

- Site Suitability Assessors
- Structural Engineers
- Landscape Architects
- Quantity Surveyors
